Juan Guillermo Barrios Villamil

ELECTRONIC ENGINEER | HIGH RISK OPERATIONS | DATA & BUSINESS ANALYSIS

Bogotá, Colombia · juguibavi27@gmail.com · LinkedIn · GitHub

PROFESSIONAL PROFILE

Electronic Engineer from Universidad de los Andes with experience in high-risk account review, billing analysis, record validation, and operational follow-up. At Iron Mountain, I work across account status, service, invoice, and payment information; build reports and charts; and develop automation logic to help the team prioritize cases. Seeking junior Data Analyst, BI Analyst, Business Analyst, or Operations Analyst roles.

PROFESSIONAL EXPERIENCE

Strategic Planning & High-Risk Account Specialist

Iron Mountain · Hybrid · May 4, 2026 – Present

- Review and prioritize high-risk account cases, maintain case status, and coordinate operational follow-up across the broader High Risk function.
- Use Excel to compare account, invoice, payment, inventory, and service records; validate information and investigate billing discrepancies.
- Design and build operational reports, charts, and automation logic that help the team identify accounts for review and organize follow-up.
- In some inactive-account cases, explain the outstanding invoice balance and payment requirements when a customer asks about restoring service; authorized teams make account-status decisions.
- Coordinate with customer-care and other teams to obtain missing information, clarify case status, and route next steps.

Workload context: My current assigned queue is approximately 20 cases. Historically, one person handled around 200 cases in the function. These figures describe different workload setups and are not a like-for-like productivity or impact comparison.

IT Support Assistant

CivilTech Ingeniería y Construcción S.A.S. · Dec 1, 2025 – Jan 31, 2026

- Performed software quality testing and tracked electronics inventory.
- Conducted preliminary exploration of business opportunities related to sensors.

Customer Service Agent

Foundever de Colombia · Feb 17 – Jul 2, 2025

- Handled customer service requests in an English-language support environment.
- Communicated case information clearly and followed established service workflows.

SELECTED ANALYTICS PROJECTS

Bogotá 2025 public-budget commitments

Business question: How did cumulative public budget commitments change during 2025, and which entities and budget items had the largest December totals?

- Analyzed 7,681 official detail records across 50 entity labels and 2,198 budget-item codes.
- Reconciled monthly changes to COP 36.26 trillion in cumulative commitments at the December 2025 cut.
- Used Python to clean and validate the source; documented SQL tables and analysis queries including joins, CTEs, and window functions.
- Kept 752 records with month-to-month decreases for review as possible source adjustments rather than deleting them.

NovaTech invoice and payment review

A fictional business simulation with an editable CSV feeding a local dashboard; the dataset is generated and contains no employer or customer records.

- Built a 4,800-row monthly dataset covering 2024–2025 with invoice, payment, recovery, and outstanding-balance fields.
- Separated Canada/CAD and United States/USD views to avoid mixing currencies.
- Documented Python and SQL checks for unique IDs, valid periods, invoice/payment reconciliation, and status consistency.
- Excel users can edit the CSV and refresh the local dashboard to recalculate the displayed metrics.

EDUCATION

Electronic Engineering · Universidad de los Andes · Degree awarded October 20, 2025

Thesis: Design, implementation, and IoT automation of electronic systems integrating an adjustable voltage source and an AD9833 signal generator. Work involved system integration, measurement, and technical testing.
